

I greatly benefit from the traffic reports on XM. I commute 105 miles per day, pay a monthly subscription of \$9.95 and am very happy to receive this valuable and in depth service. I can truly say that most of the traffic reports on FM radio in Los Angeles are wrong. In fact, I believe that they just make up the information, especaill on KLSX.

By limiting this new technology you would be relegating us to the stone age. Just think if there was no cable, who could watch CSPAN?
